Physical Disability / Chronic Health Impairment	Student's Name
Level 2 funding allocation 1701 Code D This checklist should only be used in conjunction with Section E.8 of Special Education Service: A Manual of Policies Procedures and Guidelines (Nov. 2010)	PEN Date
To be eligible the following must be met	
There is documentation of a medical diagnosis in one or more of the following areas:	There is evidence of a medical diagnosis of
nervous system impairment that impacts movement or mobility; and/or musculoskeletal condition; and/or chronic health impairment that seriously impacts students' education and achievement.	Note: For a diagnosis of a complex developmental behaviour condition including FASD, it must be made by either the CDBC Network, or BCAAN Network, or a qualified medical specialist (paediatrician, psychiatrist, neurologist or a medical professional specializing in developmental disorders) in consultation with a multi-disciplinary team of specialists (i.e. registered psychologist, speech/language pathologist, occupational therapist, physical therapist).
Assessment documentation shows that This student's functioning and education is significantly affected by his/her physical disability or chronic health impairment and/or The student with complex developmental behaviour conditions, including FASD, exhibits an array of complex needs in two or more domains which significantly impact the student's education and achievement.	There must be documentation to support that the student has been appropriately assessed and identified by the school district or independent school authority as meeting the criteria of the special education category. Students with mental illness should be reported in the behaviour category that matches their needs. Assessment documentation and other information should indicate that the extent and impact of the medical condition is such that there is a need for significant support services.
	For students with complex developmental behaviour conditions, assessment documentation must address an array of complex needs and identify two or more of the following domains as being significantly impacted: academic/intellectual functioning (development, learning, cognition*) social-emotional functioning (behaviour, mental health, social skills, peer relations*) self determination/independence (adaptive skills, safety, daily living skills*) physical functioning (neuro-motor functioning, motor skills, self care*) communication (receptive and expressive language, speech intelligibility/impairments*)

There is documented evidence that	
A current IEP is in place, dated after September 30, previous school year.	
The IEP has individualized goals and measurable objectives, with adaptations and or modifications where appropriate, and strategies to meet these goals.	
The goals correspond to the category in which the student is identified.	
The services outlined in the IEP relate to the identified needs of the student.	
The student is receiving special education services to address the needs identified in the assessment documentation that are beyond those offered to the general student population and are proportionate to level of need.	
The student is being offered learning activities in accordance with the IEP.	
The IEP outlines methods for measuring progress in relation to the IEP goals.	
A parent was offered the opportunity to be consulted about preparation of the IEP.	
Reduction in class size is not by itself a sufficient service.
